100x Inspection Microscope

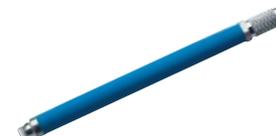

Stripping tool for secondary coating

Light rod

FO Tool Set inclusive Supplementary Sets

Sapphire scribe

Kevlar Cutter

Cleaning tissues

Crimp Tool

Polishing foils 30 μm

Polishing foils 3 μm

Polishing foils 0,3 μm

Termination Tool Set for FO connectors

This robust FO Tool Case is really indispensable for contractors who have to terminate FO connectors on site. The basic set includes all necessary tools and accessories for cable and fibre preparation, a crimp tool for Telegärtner FO connectors and a high-performance microscope for fibre end face inspection. The basic set may be enhanced by adding different Supplementary Sets for Heat Curing

with oven, or for the new Fast Cure bonding process. Polishing discs providing a controlled pressure for polishing of connectors type ST and SC are also available, as well as a 200x Conversion Eyepiece for the microscope. Additional available accessories are polishing pads, polishing films and cleaning fluid.

Description

Basic equipment

- with tools and accessories for cable and fibre preparation, Crimp tool and 100x inspection microscope
- *Robust aluminium case* with additional compartments for Supplementary Sets and consumables

Supplementary Sets

- Fast Cure with Quick adhesive for curing within 30 sec. at room temperature
