

# IP67 Industrial Grade RJ45 Mounting Flanges

**Telegärtner**

## IP67 Industrial Grade RJ45 Mounting Flanges

These components expand the existing line of the Telegärtner industrial RJ45 connection System with protection class IP67. With two different RJ45 installation solutions for modular jack inserts, Ethernet connections for Cat.5e or Cat.6 components can now be created under even the harshest industrial conditions and can be protected in accordance with the IP67 standard. The mounting

flanges are fixed directly on the exterior wall of industrial circuit cabinets or on mounting walls. The use of the J00029A0039 mounting set provides you with a simple and time-saving means of installing the mounting flanges. An operational connection is then established by the tool-free engagement (snap-in) of the appropriate RJ45 Cat.5e or Cat.6 modules.

### Characteristics

- Simple and time-saving installation
- Captive cover for IP67 provides a secure seal when the connector is not plugged in
- With the connector plugged in, IP67 protection is provided by the industrial RJ45 connector
- Connection of commercially available RJ45 connectors is possible (IP20 protection)
- Tool-free mounting of the RJ45 Cat.5e and Cat.6 modules (snap-in)

Mounting flange without mounting set

Order No.	Description	Coupler
J00029A0040	Mounting flange IP67 for Cat.5e coupler (f-f)	<b>with</b> mounting set
J00029A0042	Mounting flange IP67 for Cat.5e coupler (f-f)	<b>without</b> mounting set

#### Accessories

J00029A0033	RJ45-Cat.5e coupler, f-f, 180°, snap-in, shielded
J00029A0037	RJ45-Cat.5e coupler, f-f, 180°, snap-in, unshielded

Order No.	Description	MJ-modul
J00029A0041	Mounting flange IP67 industry for MJ-modul RJ45 Cat.6	<b>with</b> mounting set
J00029A0043	Mounting flange IP67 industry for MJ-modul RJ45 Cat.6	<b>without</b> mounting set

#### Accessories

J00029A0035	MJ-Module Cat.6, snap-in, shielded

## Mounting Set for IP67 Industrial Grade Mounting Flange

The mounting set offers you a professional and time-saving installation of the IP67 industrial grade mounting flanges. The zinc diecast frame with its integrated M3 thread holes is screwed to the opposite side when the mounting flange is

positioned on the mounting surface (screws included in the delivery). This ensures a sealed and tight fitting in accordance with the specifications for the IP67 protection class.

### Characteristics

- Simple and easy installation
- The RJ45 mounting flange is perfectly fitted on the mounting surface
- No additional mounting hardware required
